Where did we get these names of healthcare providers? This list of medical professionals is compiled of names submitted to the Forum from members herein and are not personally endorsed by the owner or any administrators of this forum. Some of these professionals have received both good and bad reviews. It is up to each individual to seek out suitable and responsible healthcare providers for themselves and family members. We offer this list only as a starting place to gather names you may want to investigate. Under no circumstances should anyone consider any or each professional listed here as safe, knowledgeable or fit to be their healthcare provider. We have done our due diligence to see that the information herein is accurate, but we acknowledge there will inevitably be errors as changes occur.

Why wasn't the name I submitted included here? Some of the medical care providers were deemed not suited to MCAS disorders, some had gone out of practice, a few had lost their licenses, while others had too many conflicting contact information.

What if I see errors in the list? Please comment below and supply the correct information. We will, from time to time, update this list and will include necessary changes.

How do I add to this list? If you have a healthcare provider you would like to see added, please comment below (including full name, title, specialty, address and phone number) and we will take that name up for advisement when we update the list.

As the Forum owner and administrators here, we hope this list helps you in your search for the right healthcare provider for you.
